

#### Disclaimer

This presentation ("Presentation") has been prepared by Larus Energy Limited ("Larus" or the "Company") as a presentation to the 12<sup>th</sup> PNG Mining & Petroleum Investment Conference. The Presentation is a summary only and does not contain all the information about the Company's assets and liabilities. This material may be given in conjunction with an oral presentation and other more detailed documents and should not be taken out of context. While management has taken every effort to ensure the accuracy of the material in the Presentation, the Presentation is provided for information purposes only. No representation or warranty, express or implied, is or will be made by Larus Energy or its officers, directors, employees or advisers as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in, or implied by, this Presentation, or as to the reasonableness of any assumption, forecasts, prospects or returns contained in, or implied by, this Presentation may include information derived from third party sources that has not been independently verified. To the extent permitted by law, the Company and its officers, employees, agents and advisors do not accept liability to any person for any direct indirect or consequential loss or damage arising from the use of this material.

This Presentation does not constitute investment, legal, taxation or other advice and the Presentation does not take into account your investment objectives, financial situation nor particular needs. Neither this Presentation nor the information contained in it constitute an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction. Investors and potential investors should not rely on this Presentation. This Presentation does not take into account any person's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations in this Presentation are not intended to represent recommendations of particular investments to particular persons.

All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. The information set out in this Presentation does not purport to be all inclusive or to contain all the information which its recipient may require in order to make an informed assessment of the Company. You are responsible for forming your own opinions and conclusions on such matters and should make your own independent assessment of the information contained in, or implied by, this Presentation and seek independent professional advice in relation to such information and any action taken on the basis of the information.

#### **Forward Looking Information**

This Presentation contains forward looking and other subjective information. Forward-looking statements can generally be identified by the use of words such as 'project', 'foresee', 'plan', 'expect', 'aim', 'intend', 'anticipate', 'believe', 'estimate', 'may', 'should', 'will' or similar expressions. Indications of, and guidance on, production targets, targeted output, development or timelines, exploration or expansion timelines, infrastructure alternatives and financial position and performance are also forward-looking statements. Such expectations, estimates, projections and information involve known and unknown risks and uncertainties and may involve significant elements of subjective judgment and assumptions as to future events which may or may not be correct, and actual results and developments will almost certainly differ from those expressed or implied and you should make your own assessment of the expectations, estimates, projections and the relevant assumptions and calculations upon which the opinions, estimates and projections are based. Any forecast or other forward-looking statements contained in this Presentation are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Larus Energy. There can be no assurance that actual outcomes will not differ materially from these statements. The forward-looking statements included in this Presentation involve subjective judgment and analysis and are subject to significant business, economic and competitive uncertainties, risks and contingencies, many of which are outside the control of, and are unknown to Larus Energy. Given these uncertainties, you are cautioned not to place undue reliance on forward-looking statements. These forward-looking statements are based on information available to Larus Energy as of the date of this Presentation. Except as required by law or regulation the Company does not undertake any obligation to update or revise any information or any of

# Today's agenda

- Company overview
- Papua New Guinea our focus
- Work progress
- Resource size and commercialisation
- Working in Papua New Guinea
- Health, safety and environment
- Summary

#### A journey through other parts of PNG

### Corporate overview

- Larus Energy Limited is ASX ready corporate governance, independent geologist's report, audited ASX compliant accounts, draft prospectus
- Spread shareholder base, no dominant shareholder
- Sydney Head Office, PNG office at Kupiano

#### Capital structure (30 November 2012)

Shares outstanding	162.1m
Granted options (15-40 cents)	16.5m
Capital raised since inception	>A\$13m
Debt	Nil

#### **Shareholders**

Number of shareholders	~460
Top 20 shareholders	38%
Board and management	7%
Market cap @ 20cps	A\$32.4m

Our goal: develop data-rich, drillable, farmout-ready petroleum exploration assets

### Larus Energy Limited – a PNG story

Larus Energy Limited is an Australian public unlisted petroleum exploration company with 2 assets:

Torres Basin, Papua New GuineaOnshore and offshore

**PPL 326** 

Area: 16,752km<sup>2</sup>

100% Larus

Gippsland Basin, AustraliaOffshore

VIC/P63, VIC/P64 and T/46P

Area: approx. 8,300km<sup>2</sup>

**100% Larus** 

#### Focused approach with high potential uplift

#### There is more to PNG

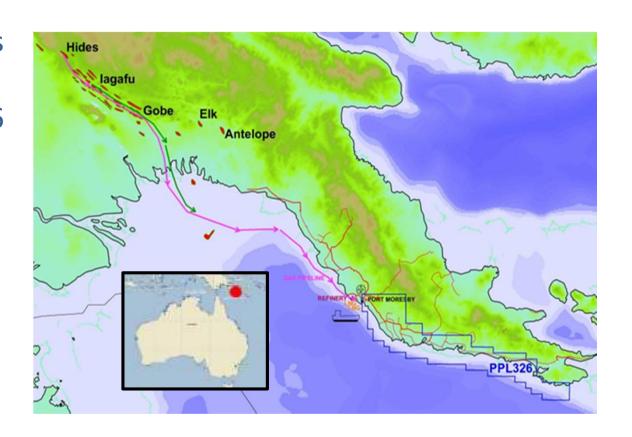

#### **PNG** does extend east of Port Moresby

#### Larus Energy Limited – Focused on PNG

The Company's priority focus has and remains its PNG petroleum project in PPL 326

- We are in Year 4 of the initial 6 year term
- Work commitment has been completed on time and exceeded
- First time area under licence

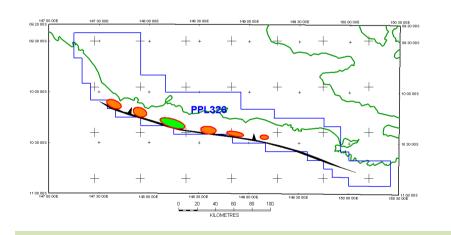

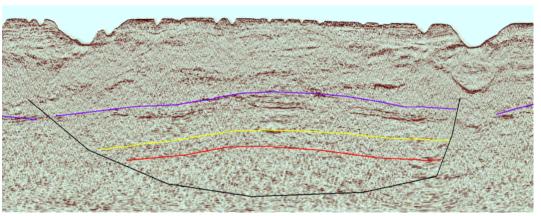

Larus Energy is dedicated to developing oil and gas in PNG

#### Where were we in 2010

- 2010 conference we had just embarked on our exploration journey:
  - Just obtained Fugro-Searcher Lahara 2D 2006 sesimic data
  - Just found the 1981 Sonne regional survey data
  - Identified a number of leads on the frontal thrust
  - Quantified Sunday Strong Lead as a structure much larger than Hides
  - Recognised we were possibly sitting on something special

#### Unique opportunity to unearth new oil and gas provinces in PNG

### Where are we today

- Tantamount to a buried Highlands
- Contains its own kitchen
- The interpretation concludes that a
   Mesozoic petroleum system containing
   both source and reservoir is likely to exist
- All known existing plays in the Papuan can be demonstrated in the Torres Basin
- At least 12plays to be pursued
- Key play risked at 40%, key prospect risked at 9%
- Arimia Graben
  Complex

Kutubu

 World-class potential: aggregate unrisked resource over 90 TCF gas in place and 1.5 billion barrels of oil in place so far identified

New basin uncovered: twice the area of Highlands and world-class potential

#### Terrain differs from the rest of PNG

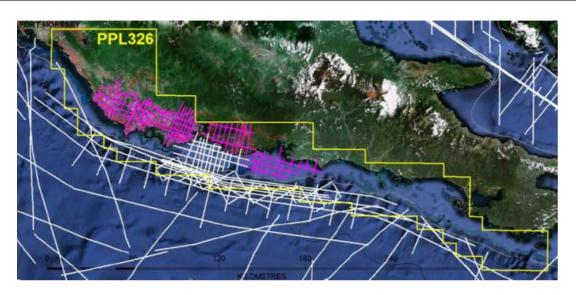

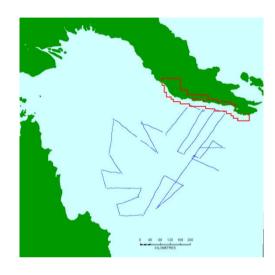

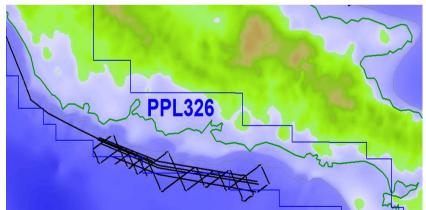

#### No helicopters required!

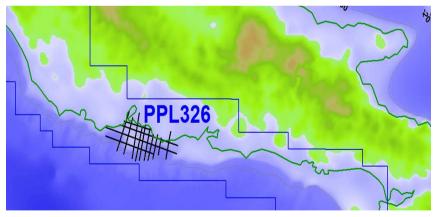

# Larus Energy's key advantage

Larus is the ONLY company to have reviewed ALL data relevant to PPL 326

### Baramata Deep Water Seismic Survey 2011

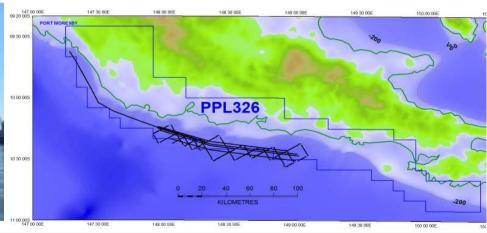

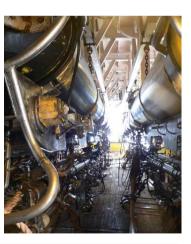

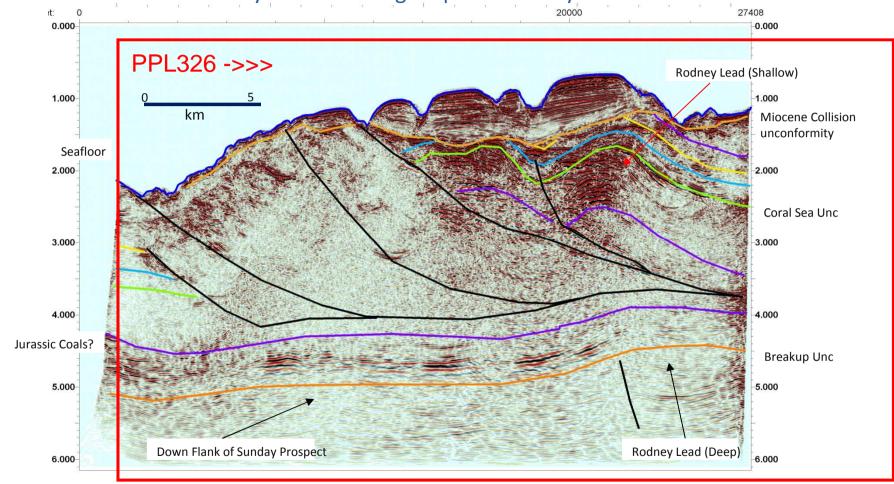

1,000km of targeted 2D seismic provides more clues

## Technical work highlights world-class potential

Baramata 2D seismic survey – the first target-specific survey in the area

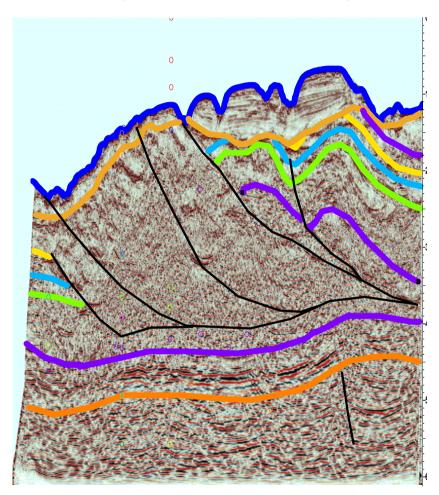

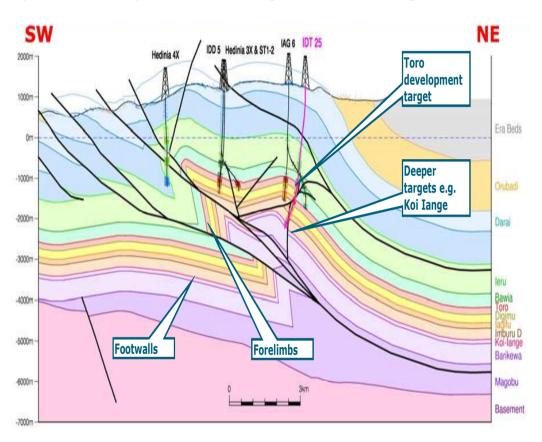

Baramata survey shows PPL 326 amounts to a 'buried highlands'

### Structural resemblance to Highlands

Baramata Deep Water Seismic Survey LB11-12 compared to Papuan Basin Highlands Geological Section

Source: Oil Search Ltd Investor Field Trip Presentation Nov 2011

Structurally, south-east PNG is very much like the Papuan Highlands

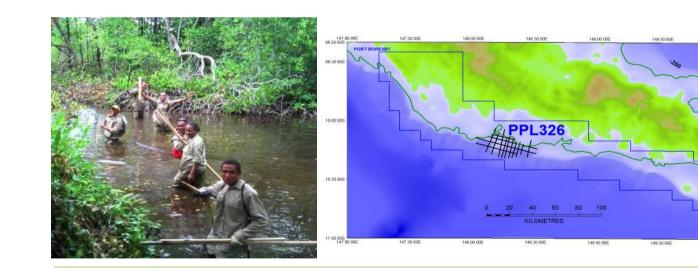

## Abau Shallow Water Seismic Survey 2012

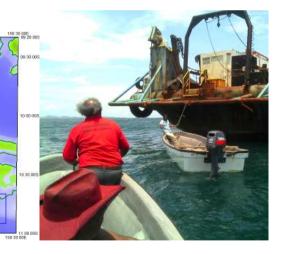

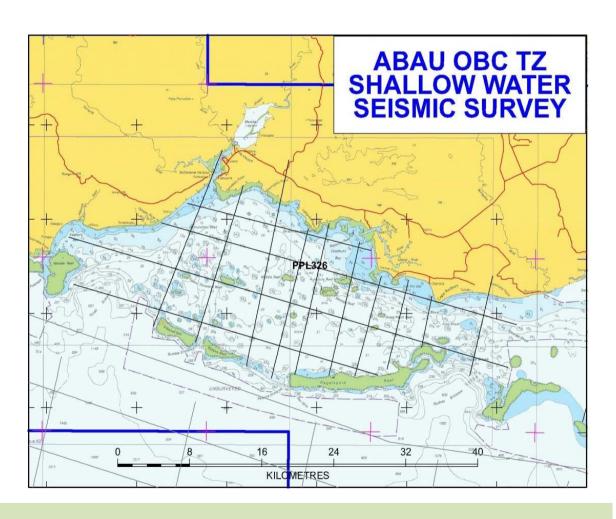

300km OBC shallow water/TZ seismic unlocks more secrets

### Shallow water 2D seismic survey

- Abau shallow water transition2D seismic survey completed
- Data processed and interpretation being finalised
- Maturing existing leads and prospects
- Adding new leads, prospects and plays
- Produced a direct hydrocarbon indicator
- Shows the former hills now buried – under 800m of mud

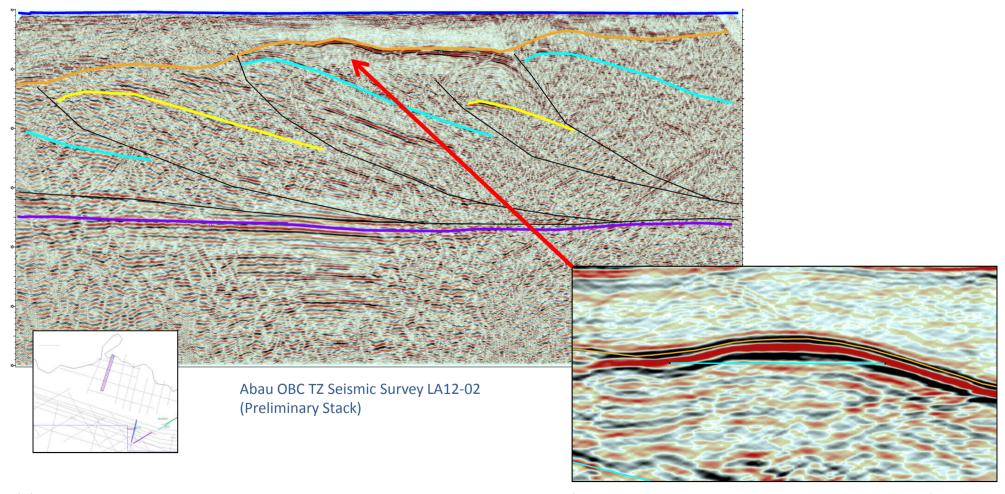

More shallow water/TZ seismic will produce more prospects

### PPL 326 just gets better

- The 'Holy Grail' of seismic exploration and usually a direct indication of gas in the system
- The lack of oil and gas seeps at the surface is now understood

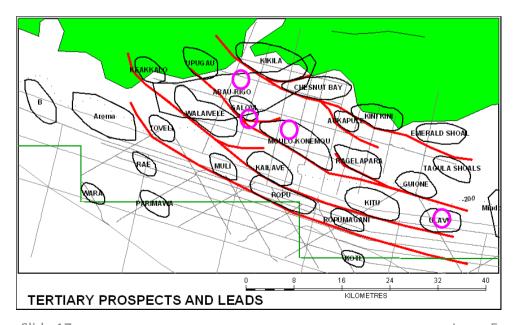

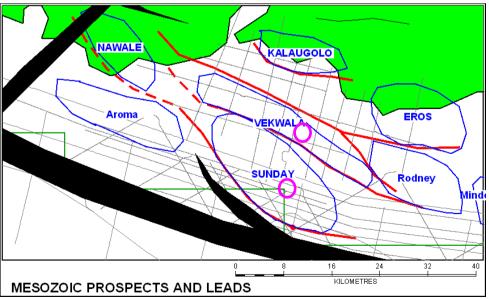

## PPL 326 – Prospects and leads

- Seismic data initially identified 50
   leads/prospects just the beginning
- Aggregate unrisked resource 92 TCF gas in place and 1,500 MMbbls oil in place

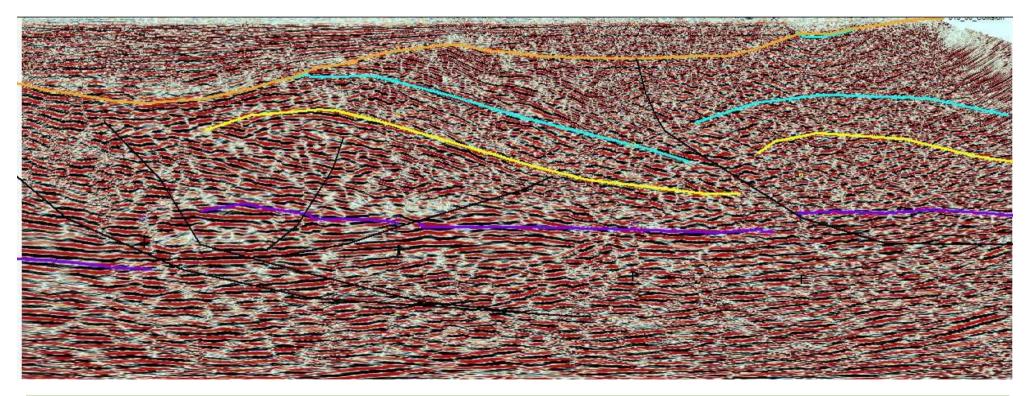

## PPL 326 – Prospects and leads

- Vekwala Prospect bigger than Sunday Prospect and in shallow water
- Unrisked resource 13.9 TCF gas in place and 186 MMbbls oil in place (using published parameters for Hides)

#### The large structures just keep appearing

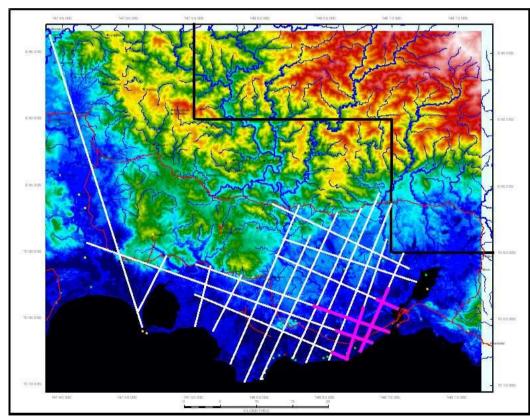

## Work underway

- 300 450km onshore seismic program to commence shortly
- Line cutting well advanced using local crews
- Precursor to onshore drilling program planned to commence in 2013

### Good commercialisation prospects

- 180km by road to Port Moresby, only need 150km offshore pipeline
- Large Mesozoic targets lend themselves to an LNG project existing, new, in the area
- Smaller shallower Tertiary targets expected onshore lend themselves to domestic gas – pipeline to Port Moresby (electricity generation), distributed CNG barged from Marshall Lagoon to isolated regions

### Working in PNG

- PNG headquarters established in Kupiano – provides closer link and access to people in the region
- Community awareness meetings have been occurring in the region and land access agreements being executed
- Local employment in areas where operating activities occur
- Local sewing club making uniforms
- We are small and an explorer, but support our region where we can

## Health, safety and environment

- Focused on HSE:
  - ➤ OBC technique used for Abau seismic survey in and around reefs
  - Fish monitoring program conducted as part of that
  - Onshore seismic to be acquired by minisosie or vibe where possible
  - ➤ Nil HSE incidents to date

#### Summary

- Highly prospective, underexplored permit in Papua
   New Guinea
- 100% owned permit located close to major producers and infrastructure
- Modern exploration techniques being applied with modern datasets
- Moving to bringing in experienced partners to take exploration to the next level
- Experienced Board and Management with significant commercial, technical and management experience in the oil and gas sector

#### PNG, a great place for developing oil and gas

### Larus Energy – Join the excitement
